

ACCENTURE REVIEW:- FERN No 1

“Subsequently, both scores were weighted with the relative weights that had been defined for obtaining the final score. Due to the comprehensive quantitative and qualitative assessment which had been made, the project team was confident that the final ranking provided a strong indication of the relative strength of a particular vendor’s solution. The following table illustrates the outcome of the scoring process, including the survey score, the score for the answers to the open-ended questions (OEQs), as well as the total score per vendor.”
